ADBA task list:

Daily:

- Check of the backups
- Checking the DB Spaces and chunks
- Checking online logs for errors
- Checking size and growing of databases and tables
- Checking read and write effectivity
- Checking read ahead effectivity
- Check if there are lock waits
- Check regarding sequential scans

Regularly:

- Archiving of the database log files (online.log, ixbar.log)
- Checking the write balancing
- Ensure that no foreground writes occur
- Utilization as well as load distribution of the VPs
- Monitoring the amount of virtual memory segments
- Checking whether new bug fixes for our version are recommended

Team Communication:

1. ADBA Team: DL-TSSC-OSLO-ADBA
2. Application Team: DL-DE TISF_ePos_Support [ZV] - MXL <TISF-ePos-Support-ZV.de@vodafone.com>
